

Road, sea or air, ETA can ensure that your horse arrives when and where you require it

ETA - Equine Travel Agency Ltd are professional International horse transporters, fully Defra authorised and with an International Operators Licence. They specialise in the long-distance transport of horses in the UK, Europe and all around the World. Whether it be by road, sea or air, ETA can ensure that your horse arrives when and where you require it. Uniquely, they are the only International Horse Transport Company based in Dover and as such are able to offer excellent facilities to care for your horse on route to or from the continent.

The services that Equine Travel Agency offer are European road transport, International flights, ferry bookings, export documentation and overnight stabling. Their top class trucks have a maximum carrying capacity of 31 horses, providing road transport on a weekly basis to Belgium, Holland, Germany, Scandinavia and Eastern Europe, they also transport to France, Spain and Portugal every two weeks.

ETA have a truly impressive fleet of modern vehicles, which are inspected and serviced every 6 weeks to International Operators Licence standards as required by VOSA. The trucks are all covered by Mercedes-Benz European breakdown cover and are inspected and certified by Defra for the transport of horses. The trucks are specifically designed for the safety and comfort of the horses, each truck has a ventilation system, temperature control and CCTV monitoring. The vehicles all have air suspension which provide the smoothest possible ride, the suspension also adjusts to give the optimum angle for loading. All trucks are checked, maintained, steam cleaned and disinfected prior to every journey.

The ETA drivers are true professional horsemen and women who hold their Defra Advanced Certificate of Equine Transport and are specifically tested, trained and employed for their excellent driving and horse skills.

For horses that need to be flown Internationally, ETA have a dedicated flight department who can handle all of your requirements. By using European airports they can offer very competitive flight packages, including all paperwork, customs, quarantine, and road transport requirements. ETA will organise and seamlessly bring together all parts of the journey, with as little stress as possible to both horse and owner!

ETA's headquarters and offices are ideally located on their private 13 acre farm which is approximately ten minutes from the port of Dover. The access is excellent for every size and type of vehicle including articulated trucks, there is a huge parking and turning area and a fully fenced loading ramp for 3 lorries to use at any one time. The loading ramp provides a perfectly level loading angle, making it easy to load/unload even the most inexperienced or nervous horse and leads directly into the stable complex. There are 3 barns holding 28 internal stables, all on rubber matting with clean shavings and auto-drinkers. There is separate mare and foal accommodation, and purpose built stallion boxes.

The onsite offices are situated adjacent to the loading ramps and stables, and overlook the excellent turn-out facilities that are all on flat, level, post and rail fenced pasture, with small sub-divided "play-pens" using Fieldguard permanent electric fencing. The Monarch Consort Plus horse walker can take 5 horses, and is available to provide further exercise if required.

Equine Travel Agency has a very comprehensive website, that can be visited at www.eta.uk.com
